

## We are looking for an expert, meaning you are hands-on senior **C# developer** with a desire and potential to become a leader.

Our Core Solutions team gathered a few developers that work on Microblink Business Platform that consist of several services:

- Microblink SDK license management
- Cloud API supporting services
- Developer Hub
- Third-party business service integrations (CRM, CMS, ERP...) and much more

Microblink Business Platform is a set of services ensuring the best user experience for our clients and business departments, covering releases, sales, integration, support and analysis.

### **If you join our team, you will:**

- Spend around 50% of your time on hands-on development during your first few months until you jump in into a leader role
- Work on our applications built on modern principles, using a microservice architecture, on dockerized and serverless environments
- Organize iterations in collaboration with Product Owners
- Together with the team, take ownership over technical decisions, processes and cross team collaboration
- Collaborate with people in a variety of roles, like DevOps engineers, QA engineers, UX designers, UI developers, Product owners, etc.
- After successful onboarding, manage day-to-day activities of the team and motivate the team to achieve team OKRs
- In collaboration with HR, work on upskilling your team members by creating and promoting individual competency development plans
- Contribute to the growth of the company through a successful team

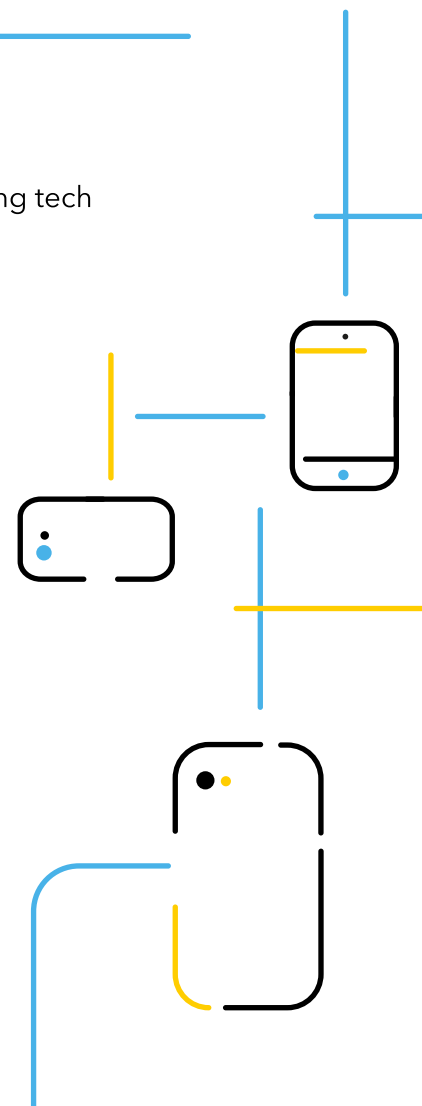

## You are the right person for us if you:

- Have a Bachelor's Degree in Computer Science, Computer Engineering, related discipline, or equivalent working experience
- At least 5 years of experience working as a hand-on software developer
- Proven leadership experience gained through leading a project, training or mentoring new team members, while not necessarily being in a leadership position
- Have good organizational and communication skills
- Are proficient in English (both written and spoken)
- Have strong full stack knowledge and experience working with:
  - .NET core framework and C# language
  - RESTful API design
  - at least one big front-end framework (like ReactJS, AngularJS or Vue.js)
  - both SQL and NoSQL databases
- Have experience with (which will be an additional plus, but is not required):
  - working on or integrating business applications like Salesforce (CRM) or NetSuite (ERP)
  - CMS
  - cloud platforms (like AWS, GCP or Microsoft Azure)
  - docker containers
  - microservice architecture

---

## Here is what we bring to the table:

- An opportunity to learn and develop your skills in the fast and smart-growing tech company through:
  - Direct mentorship - we make sure everyone constantly grows, and we will provide you with guidance and support from more experienced team leaders
  - Knowledge sharing and internal educations, both expert and more wide knowledge
  - Dedicated time for personal growth and adopting new skills
  - Dedicated budget for professional development
  - Attending educations and conferences i.e. Build, .Next or SQLBits
  - Online and live courses
  - Internal library that keeps growing, based on our needs and interests
  - An opportunity to build your own competency development plan together with your peers
- An opportunity to work in a motivated, open-minded team that cherishes new ideas and initiatives
- A culture that recognizes and rewards success, and is not afraid to try, fail and learn from the mistakes

- We are sport enthusiasts, so if you are one too, you can run with us, hike to the mountains or you can use your Multisport card to play any other sport :)
- We take special care of our parent-team members by preparing personalised gifts and organizing cool events for their kids, we cover paid leave for parents and 100% paid sick leave for their kids
- Although our team members like to spend time at work, we value their free time and guide them to spend their quality time off work as well
- If you are a modern technology lover, we feel you. That's why we offer you an additional individual budget for the equipment
- Together with us, you will build extraordinary and future oriented products for more than 200 million end users with constant growth!
- An opportunity to take a lead as a front-face in industry-specific networking events, talks, and panels
